SEPERATE LOGIC AND MOTOR
POWER

ZERO PRESSURE
ACCUMULATION

INTEGRATED POWER SUPPLY

IP65 CASING AND CONNECTORS

D

Die Steuerung BP120 IP65 ist für den Antrieb von zwei NDW-E-Motorrollen ausgelegt. Dank zwei integrierten Sensoranschlüssen eignet sich die Steuerung für eine Vielzahl von Anwendungen in der Intralogistik. Mit Hilfe des integrierten Transformators kann er sofort auf 230 V umgeschaltet werden und ist somit die ultimative Plug-and-Play Lösung für anspruchsvollere Logistiklösungen.

GB

The BP120 IP65 controller is designed to drive two NDW E-rollers. Thanks to its two integrated sensor connections and is suitable for a large range of intralogistics applications. Thanks to its integrated transformer it can immediately be switched to 230v and is therefore the ultimate plug and play solution for more demanding environmental applications.

HARDWARE SPECIFICATIONS

- Built-in 230Vac to 24Vdc power supply 120W
- Controls two motors with real-time speed feedback
- 8 configurable I/Os for sensors & actuators
- On-board memory for data collection storage
- Graphic user interface for instant control and flexibility
- Separated motor and logic power

SOFTWARE SPECIFICATIONS

- In-field firmware updates possible
- Ethercad "ready"
- Ethernet IP "ready"
- Easy configuration tool
